

# Loving the Skin You're In!

and turning back the hands of time...

Possibly the best kept secret in town, this sanctuary is a one stop shop! Beautiful You, located in Encinitas, offers cutting edge anti-aging treatments using the most advanced scientific technology and organic products. "This is serious skin care based on cellular rejuvenation which delivers real results, without the use of harmful chemicals or down time," says Kimberly Ceballos, medical aesthetician and owner of Beautiful You. Ask Kimberly what her most popular anti-aging treatment is and she'll tell you, "It's the DNA Health Institute's Cryostem Cell Therapy, followed with Photo Therapeutic's LED Light Therapy. A perfect blending of science and nature, the two work synergistically together. Each treatment is like waving the magic wand!" With just one session clients will immediately notice a much tighter and hydrated skin, visible line reduction and a clear radiant complexion. Amazing transformations can be achieved with regular office visits!
